

Environmental Management Policy

Korea Petrochemical Ind. Co., LTD. (KPIC) produces olefins, which are basic petrochemical oils, and polypropylene and high-density polyethylene, which are raw materials for plastics. We are deeply aware of the importance of preserving the global environment, which is directly related to the survival and prosperity of humanity. Accordingly, all employees strive to minimize our impact on the environment in order to create a comfortable living environment, and resolve as follows.

- We will identify environmental impacts throughout the entire business process from the purchase of raw materials to manufacturing, sales, and service, and set environmental targets to minimize adverse impact and establish measures to achieve the targets.
- We will conduct continuous environmental improvement activities in accordance with our basic environmental policy.
- We will strictly comply with environmental laws and regulations, and have set internal standards to ensure that compliance is managed thoroughly.
- We will periodically check the achievement of established goals through internal environmental audits and conduct management reviews to ensure that environmental improvement is achieved continuously.
- We will provide education and training for all employees to cultivate company-wide environmental management capabilities.
- We will minimize energy use and waste generation at source and manage environmental risks thoroughly to minimize the impact in the event of an emergency.

We have established an environmental management system in accordance with the requirements of ISO 14001, and publicly announced our commitment to environmental management within and outside the organization. All employees, including myself, pledge to faithfully implement the above environmental policy.

CEO of KPIC
